No retirement income	162,887	153,583
<b>Total</b>	<b>194,110</b>	<b>185,459</b>

**Notes:**

1. Data based on twelve monthly samples during 2000. For information on confidentiality protection, nonsampling error, and definitions see explanation at <http://factfinder.census.gov/home/en/data>
2. The Census 2000 Supplementary Survey universe is limited to the household population and population living in institutions, college dormitories and other group quarters.
3. Data are based on a sample and are subject to sampling variability. The degree of uncertainty is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true value lies between the lower and upper bounds.
4. The number of householders does not necessarily equal the number of households because of the weighting schemes for the population and occupied housing units.
